Projects

Library Management System–

Library management system is a software used to manage the different records of library which includes, User's record, Catalog of books, and the transactions of users.

Quiz App –

Build a command line python software. Which allows Users to take quiz and view their scores of current and previous quizzes. Admin can add and delete question or options of multiple-choice question. SQLite3 is also used in this for the backend processes, i.e., as databases.

Spam Classifier –

This classifier can tell whether a given sentence, or a message is spam or not. For this, a dataset of more than 3500 emails are used which were either spam or not. This dataset is used to train the model and further classifies the test messages.

Training & Certification

Data Science - Pursuing from EdYoda (May 2020)

Certificates -

Python - Edyoda ([see here](#))

DSA - Edyoda ([see here](#))

Education

2016 - 2020

Arya College of Engineering & IT, Jaipur, IN

B. Tech (INFORMATION TECHNOLOGY)

Percentage –63.5%

2014 - 2016

DAV Public School, BSEB, Patna, BR, IN

Senior Secondary Education

Percentage – 60.3%

2012 - 2014

St. Josheph's Public School, Samastipur, BR, IN

Secondary Education

CGPA – 9.8

Skills

Programming:

Python, C, SQL, HTML, CSS, Jscript

Libraries:

Numpy, Pandas, Matplotlib, Seaborn

Tools:

Git, GitHub, Jupyter Notebook,

Colab, VS Code, Tableau
